60kg

Wood

Interior

Sliding door solution that works with cavity walls for doors up to 60kg

## Overview

Pocket Door is a unique sliding door solution whereby the sliding door disappears into the cavity wall. The system offers amazing benefits for environments where space is limited such as bathrooms, en suites, kitchens, utility rooms, walk in wardrobes and disability access areas. Each Pocket Door kit comes with a pre-assembled aluminium track and header mechanism. For bi-parting doors, two kits can be used.

The system is available with an included dual soft close which catches the door in its final moments of travel and brings it gently into position - preventing slamming.

## Features and Benefits

- Six kits available for various opening widths (can be modified to suit bespoke door sizes)
- Each kit comes complete with the stud supports to create a cavity
- Available as standard or dual soft close kits
- Bi-parting and simultaneous option available (order code SIM100)
- Supplied with flush pulls (x2)
- Compatible locksets available in gold or satin (see accessories)
- Overall wall thickness with 12.5mm boards is 120mm

## Product and Door Specification

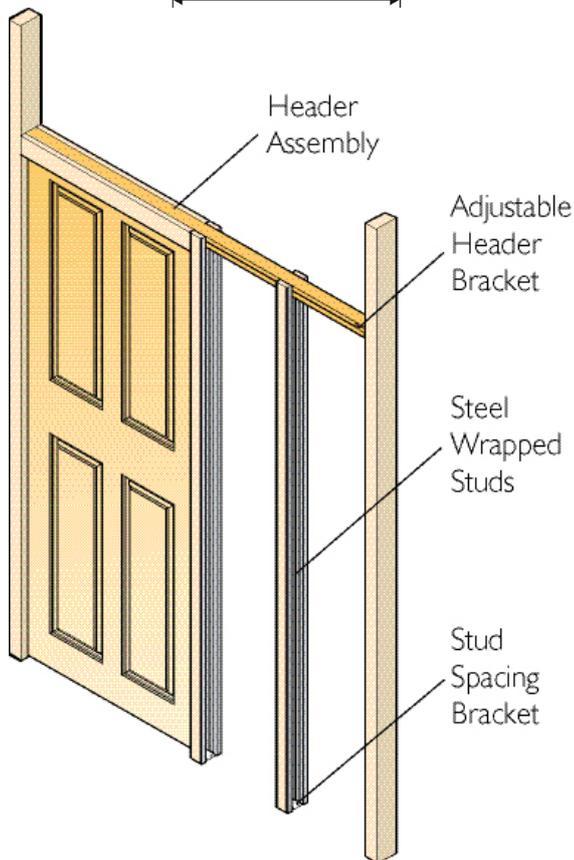

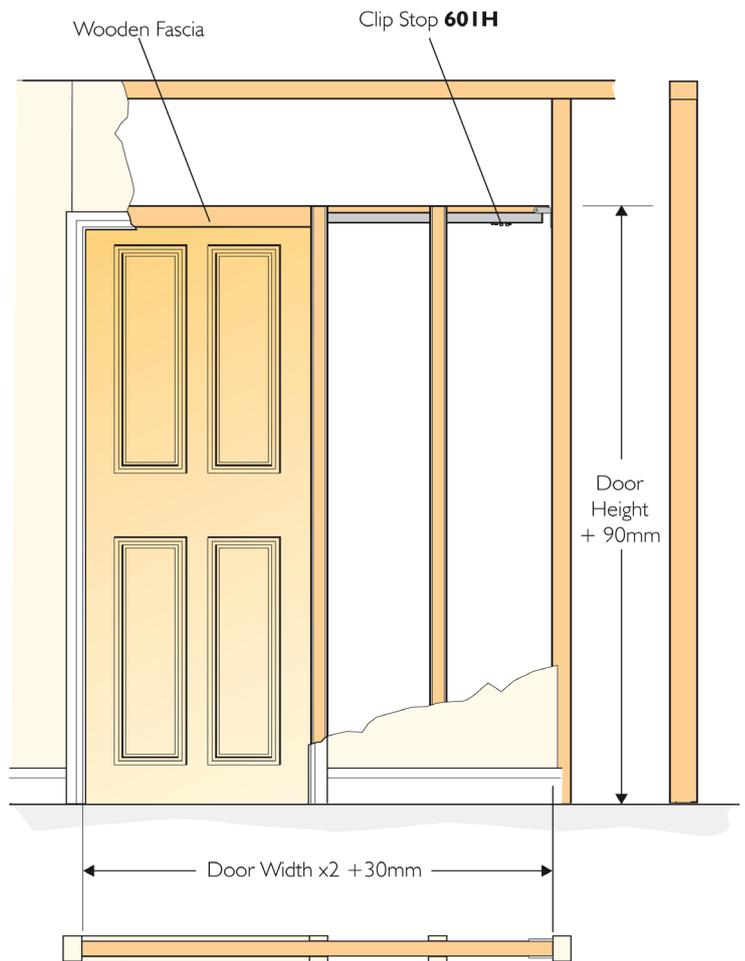

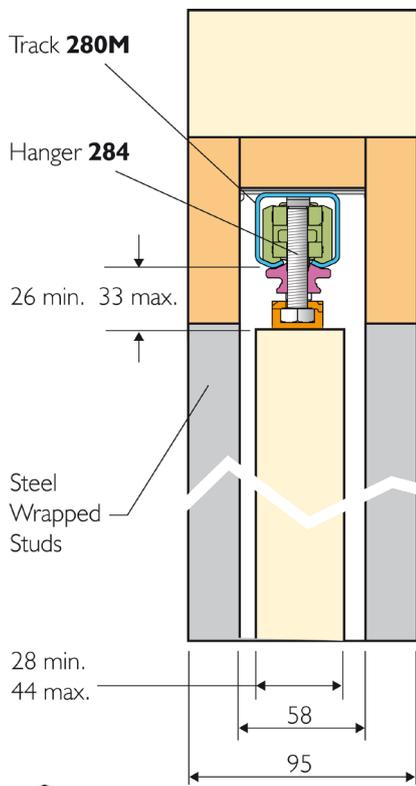

Kit Order Code		Door Thickness Range	Max. Door Width	Max. Door Height
Standard Pocket Door (Doors weighing upto 60kg)	Pocket Door with Dual Soft Close (Doors weighing 10-60kg)			
PDK3	PDKSOFT3	28-44mm	762mm	1981mm

PDK5	762mm (w) x up to 2040mm (h)	1554mm	2130mm
PDK6	826mm (w) x up to 2040mm (h)	1682mm	2130mm
PDK7	726mm (w) x up to 2040mm (h)	1482mm	2130mm
PDK10	930mm (w) x up to 2315mm (h)	1890mm	2405mm

### Finished Wall Thickness Calculation

#### 120mm Finished Wall Thickness

95mm cavity + 12.5mm plasterboard either side = 120mm finished wall thickness
