

22mm - Unvented Inlet Control Group - 3/4" Expansion Vessel Connection

Description

This unvented group set has been specifically designed to control the pressure to unvented hot water systems. The set provides the essential components including a check valve, non-adjustable Pressure Reducing Valve (PRV) set to 3 bar and a Safety Relief Valve (SRV) factory set to 6 bar. The 300 micron filter can be removed for cleaning and re-installed.

Features

- * Specifically designed to control the inlet pressure of unvented hot water systems
- * Includes a balance cold feet connection
- * Combines a PRV, SRV, check valve and filter in one fitting
- * 300 micron stainless steel mesh filter
- * CPR Compliant
- * Complies to BS EN 12897
- * WRAS Approved product
