

Sustainable Resource Commitment

M.P. Moran & Sons Ltd. are concerned that timber products should be available for the future generations and their use should have a minimum impact upon the environment.

As such the company is committed to purchasing and providing our customers with timber products that have where at all possible been sourced from sustainably managed forest.

Working with the designated suppliers we have undertaken to join the FSC and PEFC chain of custody programmes to guarantee this sustainability commitment to our customers.

We have put in place systems which will maintain this commitment and have trained key staff to manage these procedures and understand the importance of the company commitment to sustainably managed forestry.

Kevin Moran

Operations Director
