## DESCRIPTION

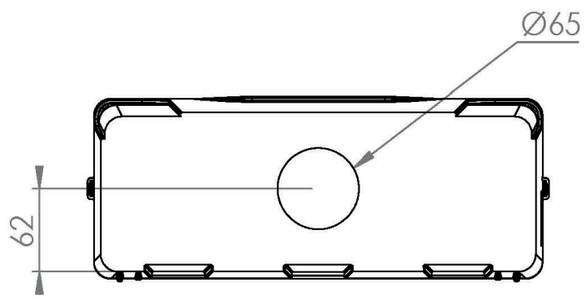

FLUSHE 2.0 is our collection of framed and concealed cisterns, flush plates, and flush buttons. They feature Fluidmaster internals which are WRAS approved, giving you peace of mind that they will not contaminate the water.

This FLUSHE 2.0 concealed slimline cistern is the perfect option if you are looking for a concealed cistern that can be fitted into smaller bathrooms. The HC2030 cistern can be concealed within our WC units, and can be paired with our back to wall toilets on its own, or paired with our wall hung toilets in addition to our FL5053 frame for added support.

It includes a chrome finished dual flush button, but there are also options of brass flush buttons in chrome, matte black, brushed brass, and brushed nickel if you want to tie it in with the rest of your brassware.
