Grettz PRECISION

STRINGLINES

100m 8-Braid Stringlines
Green | Pink | Yellow

Increasingly more people are using the Grettz 100m string line because of its high visibility and durability. Because of the 8-strand braiding, the line has a high strength and won't fray when cut. Unlike many other lines, the Grettz brand is packaged on a weatherproof, durable plastic reel that prevents water logging and tangling.

Most frequently used for laying brick or blocks, stud work, concreting, laying out foundations, and many other tasks.

Available in green, pink or yellow
