DIRECTIONS FOR USE

Ensure the surface is clean, dry, and free from all dirt, grease and wax.

Rub down with fine sandpaper to smooth surface then dust off.

Shake and stir contents thoroughly before use.

Apply the knotting solution liberally with a brush over and around the knot and any resinous areas.

Allow to dry for a minimum of 1 hour before applying 2nd coat, primer or undercoat.

If the knot is very resinous apply a second coat. If resin is still leeching through, timber replacement or filler may be required.

After use clean brushes with Methylated Spirits.
