DIGITAL LEVELS

GL60 | Digital Level 600mm
GL120 | Digital Level 1200mm

The GL60 and GL120 Digital Levels are robust and reliable tools designed to deliver precise angle and levelling measurements across a range of tasks. With dual digital displays positioned on the top and side, readings are always easy to see, whether you're working overhead, flat, or upright.

Accurate to less than 0.1° at 0°, 90°, and 45°, and less than 0.2° at all other angles, the GL60 and GL120 give you the confidence to work with precision. The milled edges ensure a stable, accurate reference surface, while strong rare earth magnets provide a secure grip on metal surfaces.

Powered by 2 x AAA batteries and rated to IP65 for dust and water protection, they are ideal for on-site use. With a self-calibrating function and solid construction, these levels are ready for serious trade work.

Key features:

- 600mm or 1200mm digital level with dual backlit displays
- Accuracy: <0.1° at 0°, 45°, and 90°, <0.2° at all other angles
- Milled edges for improved accuracy and stability
- Strong rare earth magnets for secure mounting
- Self-calibrating function
- IP65 rated for dust and water resistance
- Powered by 2 x AAA batteries
