ellpro TIMBER LTD

Pro-Post

....it's all about confidence!

High performance fencing timbers with a 15 year warranty*

Through a combination of selecting 100% Redwood for our ground contact timbers, careful kiln-drying to ensure the appropriate moisture content and a next generation TANALITH preservative treatment, Ellpro Timber can offer the trade its Pro-Post range of high performance treated timbers.

Our treatment procedures carry the TANALITH Treat-Right quality accolade.

The Pro-Post range comes with a 15 year performance warranty against the premature failure from decay and insect attack.

All the raw material for our Pro-Post range is sourced from the forests of Europe. This includes slow-grown Redwoods, which are treated to UC4 ground contact standards, to give excellent results, even in the most challenging environments.

All Pro-Post ground contact timbers come with a branded identification stamp to give confidence to the consumer that the product is fully fit for purpose

What is next generation TANALITH ?

Ellpro Timber uses next generation TANALITH wood preservative in our high pressure timber treatment facilities to produce our range of high performance fencing timbers. TANALITH is a unique formulation product from Arxada, with over 20 years tried, tested and proven performance in markets around the world. It provides an advanced long term protection against the threat of wood decay and insect attack, especially for ground contact timbers.

The next generation TANALITH product we are now using also now incorporates patent pending BARamine application technologies from Arxada Wood Protection. These BARamine technologies help futher boost the already impressive perfomanceof TANALITH to provide a more consistent and deeper penetration of the preservative into the wood.

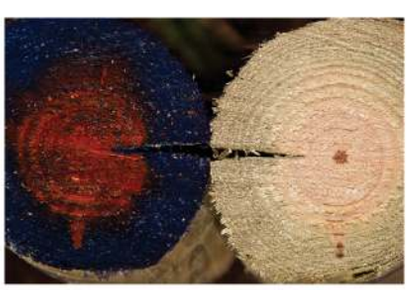

Ellpro's commitment to YOU

Because of our use of next generation TANALITH and the quality of our treatment procedures, which have the Treat-Right accolade, Ellpro has real confidence in the products we send to market. Our 15 year performance warranty gives you real confidence in their long term performance . In the unlikely event that the timbers should fail due to decay or insect attack within 15 years of purchase, then Ellpro Timber will replace the failed timbers* Providing they have been used and installed correctly and not mis-used.

Quality Treatments

The sample shown here has been sawn in half to check the depth of treatment chemical penetration. Timber will expand and contract in reaction to the ambient moisture level. This inevitably leads to splits naturally occuring in the post. The crucial factor in protecting for a long life is to ensure all the sapwood has absorbed the treatment. This way the post is protected even when the surface opens up with splits or shakes. By appying a copper spray reagent, which reacts to the treatment chemical, we can hi-light the level of penetration.

Warranty Detail

Ellpro Pro-Post treated fencing timbers, when used in accordance with the appropriate standards have a 15 year performance warranty against failureof the timber from fungal decay or insect attack.

The warranty is for the cost of re-supply by Ellpro Timber, or the re-supply by Ellpro Timber (at our option) of a component that is proven to have failed as a result of fungal decay or insect attack within 15 years of supply.

The warranty does not cover the costs of removal or reinstatement of such components or consequential costs or loss due to failure of the component. Claims must be brought within two weeks of the expiry of the 15 year period, at the latest.

The term "fungal decay" as used in the warranty refers to wood destroying fungi that feeds on and denegrate the wood cell walls. It excludes staining and mould fungi associated with the weathering of wood.

The term "insect attack" refers to attack by wood digesting insects that destroy the timbers stucture.

The term "failed" refers to damage caused by insect and/ or fungi to such extent that the component is no longer fit for purpose.
